

ABSTRACT OF THE INVENTION

The invention provides a food packaging system that preferably includes a system for facilitating progressive or incremental delivery of individual, single-serving hand-held food items to the consumer, along with a carton for containing a plurality of the food items and associated delivery systems. The packaging system provides protection for the food items during packaging, shipping handling, retail display and consumer use, and also makes them readily accessible to the consumer, without requiring direct manual contact with the food item. The packaging system preferably includes a separate disposable delivery system for each food item.
